

60069 Hydroburn PSR®

Product Specs:

Hydroburn PSR
Phase Separation Reversal
55 Gallon Drum

Quantity: 1 Each
Size: 24" x 24" x 35"
Weight: 435#

Must be shipped on a 48" x 42" pallet
Hazmat Product, MSDS Available

MADE IN USA

Description:

PSR is a fuel additive formulated for use in above and underground fuel storage tanks. It is specially designed to reverse phase separation in fuels once it has occurred, which helps avoid having to scrap out-of-spec fuels, and saves money in the process. Many Hydroburn PSR users have seen a huge reduction in the cost of having the phase-separated fuel in the tank removed, cleaned and serviced.
